Calculation Policy

Updated: September 2021

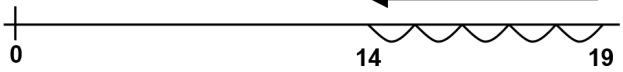

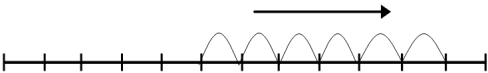

To be reviewed: September 2022

Year	Calculation Layouts	Strategies	Notes
1	<p>Calculations should be written either side of the equality sign so that the sign is not just interpreted as 'the answer'.</p> $2 = 1 + 1$ $2 + 3 = 4 + 1$ <p>Missing numbers need to be placed in all possible places.</p> $3 + 4 = \square \qquad \square = 3 + 4$ $3 + \square = 7 \qquad 7 = \square + 4$	<p>Counting and Combining sets of Objects.</p> <p>Combining two sets of objects (aggregation) which will progress onto adding on to a set (augmentation).</p>  <p>Understanding of counting on with a numbertrack.</p>  <p>Understanding of counting on with a numberline (supported by models and images). Counting on above the numberline.</p> <p>7 + 4</p>  <p>The use of other images is also valuable e.g. Numicon, bundles of straws, Dienes apparatus, multi-link cubes, bead strings.</p>	<ul style="list-style-type: none"> Read, write and interpret mathematical statements involving addition (+), subtraction(−) and equals (=) signs Add one-digit and two-digit numbers to 20, including zero Solve one-step problems that involve addition using concrete objects and pictorial representations, and missing number problems such as $7 = \square - 9$ <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><u>Vocabulary</u> add, more, plus, and, make, altogether, total, equal to, equals, double, most, count on, number line, digit</p> </div>

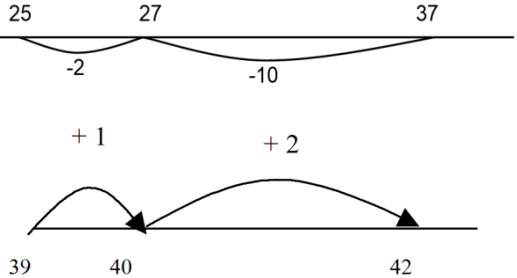

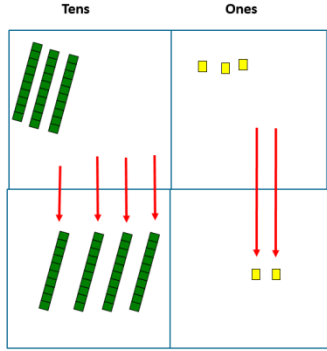

Year	Calculation Layouts	Strategies	Notes
2	<p>As for year 1, Calculations should be written either side of the equality sign and missing numbers need to be placed in all possible places.</p> <p>$47 + 25 = 72$</p> <p>Progressing to</p> $\begin{array}{r} 40 + 7 \\ + 20 + 5 \\ \hline 60 + 12 = 72 \end{array}$	<p>Continue to use numberlines to develop understanding of:</p> <ul style="list-style-type: none"> Counting on in tens and ones Partitioning and bridging through 10. Adding 9 or 11 by adding 10 and adjusting by 1 Count back under the numberline <p>e.g. $35 + 9 = 44$</p>  <p><u>Towards a Written Method</u></p> <p>Partitioning in different ways and recombine.</p> <p>$47 + 25$</p>  <p>Leading to</p> <p>72</p>  <p><u>Expanded written method</u></p> <p>When appropriate, children develop expanded written methods.</p> $\begin{array}{r} 40 + 7 \\ + 20 + 5 \\ \hline 60 + 12 = 72 \end{array}$	<ul style="list-style-type: none"> Solve problems with addition using concrete objects and pictorial representations, including those involving numbers, quantities and measures Add numbers using concrete objects, pictorial representations, and mentally, including: <ul style="list-style-type: none"> a two-digit number and ones a two-digit number and tens two two-digit numbers three one-digit numbers <p>Show that addition of two numbers can be done in any order (commutative)</p> <ul style="list-style-type: none"> Recording addition in columns supports place value and prepares for formal written methods with larger number <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><u>Vocabulary</u></p> <p>add, more, plus, and, make, altogether, total, equal to, equals, double, most, count on, number line, digit, sum, tens, units, partition, addition, column, tens boundary, exchange, inverse</p> </div>

Year	Calculation Layouts	Strategies	Notes
3	<p>Progressing to</p> <p>789 + 642 becomes</p> $\begin{array}{r} 789 \\ + 642 \\ \hline 1431 \\ \hline \end{array}$ <p>Answer: 1431</p>	<p><u>Written methods</u></p> <p>Introduce expanded column addition modelled with place value counters (Dienes could be used for those who need a less abstract representation).</p>  $\begin{array}{r} 200 + 40 + 7 \\ 100 + 20 + 5 \\ \hline 300 + 60 + 12 = 372 \end{array}$ <p>ling of the exchange between tens and ones.</p> <p>Introduced columnar method alongside the expanded method. The formal method should be seen as a more streamlined version of the expanded method, not a new method.</p>	<ul style="list-style-type: none"> Add numbers with up to three digits using formal methods of columnar addition <div> <p><u>Vocabulary</u></p> <p>add, more, plus, and, make, altogether, total, equal to, equals, double, most, count on, number line, digit, sum, tens, units, partition, plus, addition, column, tens boundary, hundreds, hundreds boundary, increase, vertical. expanded. compact. columnar.</p> </div>
4	$\begin{array}{r} 1728 \\ + 546 \\ \hline 2274 \\ \hline 11 \end{array}$ $\begin{array}{r} 1728 \\ + 5546 \\ \hline 7274 \\ \hline 11 \end{array}$	<p>Place value counters/Dienes should be used alongside columnar written methods to secure both conceptual understanding and procedural fluency. Progress to numbers with 4 digits.</p>  $\begin{array}{r} 2634 \\ + 4517 \\ \hline 7151 \\ \hline 11 \end{array}$	<ul style="list-style-type: none"> Add numbers with up to 4 digits using the formal written methods of columnar addition <div> <p><u>Vocabulary</u></p> <p>add, more, plus, and, make, altogether, total, equal to, equals, double, most, count on, number line, digit, sum, tens, units, partition, plus, addition, column, tens boundary, hundreds, hundreds boundary, increase, vertical, expanded, compact, columnar, exchange, inverse, thousands</p> </div>

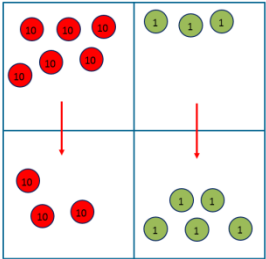

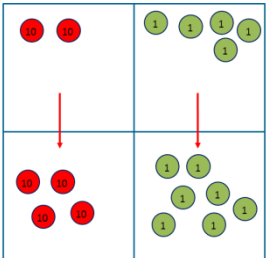

Year	Calculation Layouts	Strategies	Notes
5	$\begin{array}{r} 172.83 \\ + 54.68 \\ \hline 227.51 \\ 111 \end{array}$	Children will move on to the formal columnar method for larger whole numbers and decimal numbers.	<ul style="list-style-type: none"> Add whole numbers with more than 4 digits, including using columnar addition Add decimals including a mix of whole numbers and decimals, and decimals with different numbers of decimal places <div> <u>Vocabulary</u> add, more, plus, and, make, altogether, total, equal to, equals, double, most, count on, number line, digit, sum, tens, units, partition, plus, addition, column, tens boundary, hundreds, hundreds boundary, increase, vertical, expanded, compact, columnar, exchange, inverse, thousands, decimal places, decimal point, tenths, hundredths, thousandths </div>
6	$\begin{array}{r} 172.83 \\ + 54.68 \\ \hline 227.51 \\ 111 \end{array}$	Practise formal columnar method. Teachers should ensure that pupils have the opportunity to apply their knowledge in a variety of contexts and problems (exploring cross curricular links) to deepen their understanding.	<ul style="list-style-type: none"> Pupils practise addition for larger numbers, using the formal written methods of columnar addition Continue calculating with decimals, including those with different numbers of decimal places <div> <u>Vocabulary</u> add, more, plus, and, make, altogether, total, equal to, equals, double, most, count on, number line, digit, sum, tens, units, partition, plus, addition, column, tens boundary, hundreds, hundreds boundary, increase, vertical, expanded, compact, columnar, exchange, inverse, thousands, decimal places, decimal point, tenths, hundredths, thousandths </div>

Year	Calculation Layouts	Strategies	Notes
1	<p>Calculations should be written either side of the equality sign so that the sign is not just interpreted as 'the answer'.</p> <p>$15 - 7 = 8$ $8 = 15 - 7$</p> <p>Missing number problems e.g. $7 = \square - 9$ $20 - \square = 9$ $15 - 9 = \square$ $\square - \square = 11$ $16 - 0 = \square$</p>	<p><u>Understand subtraction as take-away (under the numberline):</u></p>   <p>Counting on):</p>  <p>Missing subtraction e.g. Numicon, bundles of straws, Dienes apparatus, multi-link cubes, bead strings.</p>	<ul style="list-style-type: none"> Read, write and interpret mathematical statements involving addition (+), subtraction(−) and equals (=) signs subtract one-digit and two-digit numbers to 20, including zero Solve one-step problems that involve and subtraction, using concrete objects and pictorial representations, and missing number problems such as $7 = \square - 9$ <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><u>Vocabulary</u> equal to, take, take away, less, minus, subtract, leaves, distance between, difference between, how many more, how many fewer / less than, most, least, count back , how many left, how much less is_?, count on</p> </div>

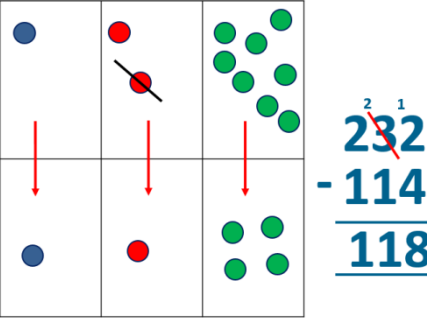

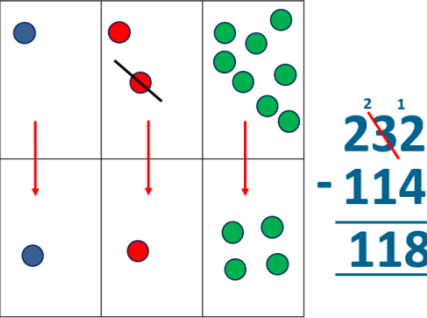

Calculations Policy – Subtraction

2	<p>As for year 1, Calculations should be written either side of the equality sign and missing numbers need to be placed in all possible places.</p>	<p>Continue to use number lines to model take-away and difference. E.g.</p>  <p><u>Towards written methods</u></p> <p>Recording subtraction in expanded columns can prepare for efficient written methods with larger numbers. The numbers may be represented with Dienes apparatus.</p> <p>E.g. $75 - 42$</p>  $\begin{array}{r} 70 \quad 5 \\ - 40 \quad 2 \\ \hline 30 \quad 3 \end{array}$	<ul style="list-style-type: none"> Solve problems with subtraction using concrete objects and pictorial representations, including those involving numbers, quantities and measures Subtract numbers using concrete objects, pictorial representations, and mentally, including: <ul style="list-style-type: none"> a two-digit number and ones a two-digit number and tens two two-digit numbers Show that subtraction of one number from another cannot be done in any order Recording subtraction in columns supports place value and prepares for formal written methods with larger number <div data-bbox="1478 766 2128 1061"> <p><u>Vocabulary</u></p> <p>equal to, take, take away, less, minus, subtract, leaves, distance between, difference between, how many more, how many fewer / less than, most, least, count back, how many left, how much less is_?, count on, strategy, partition, tens, units, inverse</p> </div>

3	<p>Short division $98 \div 7$ becomes</p> $\begin{array}{r} 14 \\ 7 \overline{) 98} \\ \underline{7} \\ 28 \\ \underline{28} \\ 0 \end{array}$ <p>Answer: 14</p>	<p><u>Grouping</u> How many 6's are in 30? $30 \div 6$ can be modelled as:</p>  <p><u>Becoming more efficient using a number line</u> Children need to be able to partition the dividend in different ways.</p> <p>$48 \div 4 = 12$</p> <p>$48 \div 4 = 12$</p>  <p><u>Remainders</u></p> <p>$49 \div 4 = 12 \text{ r}1$</p> <p>$49 \div 4 = 12 \text{ r}1$</p>  <p>Sharing – 49 shared between 4. How many left over? Grouping – How many 4s make 49. How many are left over? Children will continue to explore division as sharing and grouping, and to represent calculations on a number line <u>until they have a secure understanding.</u></p>	<ul style="list-style-type: none"> Write and calculate mathematical statements for division using the multiplication tables that they know, including for two-digit numbers times one-digit numbers, using mental and progressing to formal written methods (short division with no remainders) <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><u>Vocabulary</u> share, share equally, one each, two each..., group, groups of, lots of, array, divide, divided by, divided into, division, grouping, number line, left, left over, inverse, remainder, divisible</p> </div>

Calculations Policy – Multiplication

Year	Calculation Layouts	Strategies	Notes
3		<p>Formal short division should only be introduced once children have a good understanding of division, its links with multiplication and the idea of 'chunking up' to find a target number (see use of number lines above).</p> <p>Short division to be modelled for understanding using place value counters as shown below. Calculations with 2 and 3-digit dividends.</p> <div style="text-align: center;">  </div> <p>Children.</p> <p>of a formal method for some</p>	

Calculations Policy – Multiplication

Year	Calculation Layouts	Strategies	Notes
4	<p>Short division $98 \div 7$ becomes</p> $\begin{array}{r} 14 \\ 7 \overline{) 98} \end{array}$ <p>Answer: 14</p>	<p>Short division to be modelled for understanding using place value counters as shown below.</p>  <p>Progress to the efficient use of a formal method.</p>	<ul style="list-style-type: none"> Divide two-digit and three-digit numbers by a one-digit number using formal written layout (short division – exact answers : no remainders) <p><u>Vocabulary</u> share, share equally, one each, two each..., group, groups of, lots of, array, divide, divided by, divided into, division, grouping, number line, left, left over, inverse, short division, remainder. multiple. divisible by. factor</p>
5	<p>$432 \div 5$ becomes</p> $\begin{array}{r} 86 \text{ r } 2 \\ 5 \overline{) 432} \end{array}$ <p>Answer: 86 remainder 2</p>	<p>Children will practise the formal method of short division for larger whole numbers.</p> <p>Children should also be able to express remainder as a decimal or fraction – whatever is appropriate for the context. Ensure practical understanding allows children to work through this (e.g. what could I do with this remaining 1? How could I share this between 6 as well?).</p>	<ul style="list-style-type: none"> Divide numbers up to 4 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context <p><u>Vocabulary</u> share, share equally, one each, two each..., group, groups of, lots of, array, divide, divided by, divided into, division, grouping, number line, left, left over, inverse, short division, remainder, multiple, divisible by, factor, dividend, quotient, divisor, decimal fraction</p>

Calculations Policy – Multiplication

Year	Calculation Layouts	Strategies	Notes
6	<p>432 ÷ 5 becomes</p> $\begin{array}{r} 86 \text{ r } 2 \\ 5 \overline{) 432} \end{array}$ <p>Answer: 86 remainder 2</p> <p>496 ÷ 11 becomes</p> $\begin{array}{r} 45 \text{ r } 1 \\ 11 \overline{) 496} \end{array}$ <p>Answer: 45 $\frac{1}{11}$</p> <p>432 ÷ 15 becomes</p> $\begin{array}{r} 28 \cdot 8 \\ 15 \overline{) 432 \cdot 0} \\ \underline{30} \downarrow \\ 132 \downarrow \\ \underline{120} \downarrow \\ 120 \downarrow \\ \underline{120} \\ 0 \end{array}$ <p>Answer: 28.8</p>	<p>Children will practise the formal methods of short and long division for larger whole numbers.</p> <p>Children should also be able to express remainder as a decimal or fraction – whatever is appropriate for the context.</p> <p>Divide numbers with up to two decimal places by whole numbers with one or two digits.</p> <p>Teachers should ensure that pupils have the opportunity to apply their knowledge in a variety of contexts and problems (exploring cross curricular links) to deepen their understanding.</p>	<ul style="list-style-type: none"> Pupils practice division for larger numbers, using the formal written methods short and long division Divide numbers up to 4 digits by a two-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context Divide numbers up to 4 digits by a two-digit number using the formal written method of short division where appropriate, interpreting remainders according to the context Divide numbers with up to two decimal places by whole numbers with one or two digits <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p>Vocabulary share, share equally, one each, two each..., group, groups of, lots of, array, divide, divided by, divided into, division, grouping, number line, left, left over, inverse, short division, remainder, multiple, divisible by, factor, dividend, quotient, divisor, decimal, fraction, decimal, decimal point, tenths, hundredths</p> </div>
